Western Michigan Urological Associates, P.L.C.

577 Michigan Ave., Ste. 201
Holland, MI 49423
(616) 392-1816

daVinci® Robotic Assisted Surgery

- Holland Hospital offers the minimally invasive daVinci® robotic surgical device.
- Skilled team performs complex surgeries such as prostatectomies through small laparoscopic openings.
- 3-D camera and micro-instruments allow precise movements for delicate procedures.
- Patient benefits include minimal blood loss, reduced pain and quicker recovery.

Cryoablation

- Treatment options for prostate and kidney cancers include cryoablation; controlled freezing of tumors to destroy cancer cells.
- Ultrasound imaging and continuous monitoring guide cryoablation probes to predetermined sites for safe and effective treatment.
- Patients typically require an overnight stay and a brief recuperation period.

Prostheses/Erectile Dysfunction (ED)

- Consultations and expert treatment for ED.
- Options include prosthetic implantation with a variety of devices available.

Lithotripsy and Laser Treatment for Kidney Stones

- Ultrasonic treatment for kidney stones using mobile extracorporeal shock wave lithotripsy (EWSL) machine.
- Laser treatment avoids surgical incisions.
- Convenient hospital outpatient treatment.
- Patients experience short recovery time and resume normal activities in a few days.

Female Urology

- Treatment for urinary incontinence.
- Vaginal and pelvic organ prolapse treatment offering excellent long-term results.

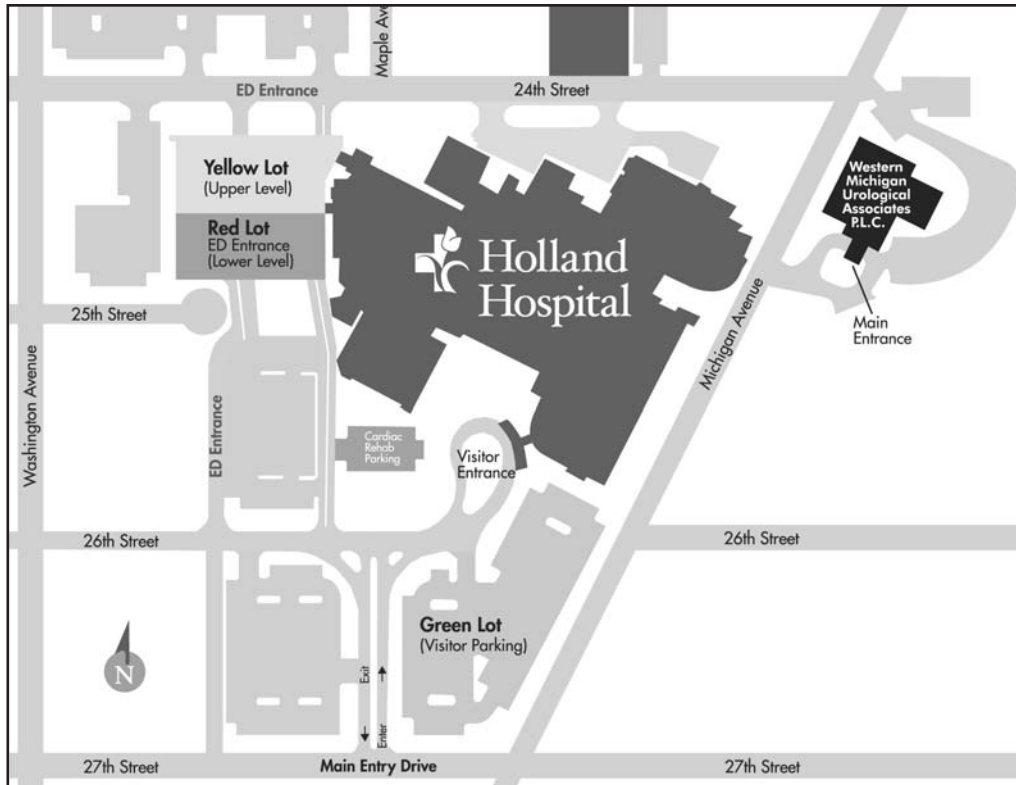

Other Services

- Diagnostic testing for bladder problems.
- Laser and microwave energy in-office treatment for Benign Prostatic Hyperplasia (BPH)/enlarged prostate.
- Care for kidney and bladder diseases.
- Pediatric urology.
- No scapel vasectomy.
