

Experienced, Personalized Care

Holland Hospital Home Health Services offers experienced care for patients of all ages. Our compassionate home health experts are available 24 hours a day, seven days a week to provide skilled nursing care and personalized service in the comfort of home.

Free Assessments

We offer free in-home assessments for prospective patients to help determine home health needs. Our trained staff will visit with no charge or obligation to provide information and answer your questions. To learn more, call (800) 996-3346 or (616) 394-3346.

The Right Choice

You can be sure you made the right choice when you choose Holland Hospital Home Health. Our program is fully accredited by CHAP – the nation’s leading accrediting agency for home health services.

Professional Care in the Comfort of Home

HOME HEALTH SERVICES

602 Michigan Avenue, Holland MI 49423

Coordinated Home Care

Patients are our first priority. We take time to understand the health care concerns of each individual and their family. Together with the patient’s physician and other medical providers, we develop a coordinated plan of care to achieve health goals, monitor progress and ensure patient comfort.

Professional Team

It takes a team of experts to deliver superior home health care. You can be confident that our professional staff will exceed your expectations.

- Registered Nurses
- Home Health Aides
- Physical, Occupational & Speech Therapists
- Dietitians
- Certified Wound Care Specialists
- Medical Social Workers
- Pediatric Home Care Nurses
- Certified Psychiatric Nurses

Home Health Services

- **SKILLED NURSING CARE:** Whether the need is for short term acute care such as post-surgical recovery or longer term care for a chronic condition, our registered nurses help patients regain health and achieve their maximum potential in the comfort of home.
- **ORTHOPEDIC CARE & REHABILITATION:** Our physical and occupational therapists specialize in getting patients back to everyday activities as quickly as possible. We use proven techniques to meet rehabilitation goals in coordination with physicians, orthopedic specialists and other providers.
- **HEART CARE:** Patients who are recovering from heart procedures or suffer from heart disease or chronic pulmonary conditions need special care. Our team is experienced in treating these concerns with expert care and compassion.
- **WOUND CARE & HEALING:** Certified wound care specialists assess, treat and monitor wound healing. Our unique wound care program includes real-time digital imaging and

immediate communication of wound conditions to ensure the most rapid, appropriate treatment.

- **CARE FOR SPECIALIZED NEEDS:** Our comprehensive home care services also include Alzheimer’s and Dementia Care; Diabetic Care; Infusion Therapy Management; Lymphedema/Edema Care; Maternal, Infant and Pediatric Care; Oncology Care; Psychiatric Nursing; Speech Therapy; Swallowing Disorders; and more.
- **PERSONAL SERVICES:** A variety of services are also available to assist patients such as medication management, meal preparation, bathing and other tasks. We recognize that these services can be welcome support to make life easier for homebound patients.
- **REMOTE TELEMONITORING:** We offer in-home monitoring to help assess and manage the patient’s health daily. This easy-to-use device collects vital signs and automatically transmits the data to our central station for clinical review. If changes in the patient’s health status require intervention, our staff communicates with the physician to follow-up.

WILL INSURANCE COVER THE COST?

It may. Please contact our staff for assistance in determining eligibility for coverage through Medicare, Medicaid or Blue Cross/Blue Shield. We will also check with other insurance companies, HMOs or other carriers for details.
